EXTENSION OF STOCK RANGE

Seamless **SUPER DUPLEX** Stainless Steel Tubes Grade **UNS S32760 / 1.4501**

- ▶ We have extended our stock programme for you:
Seamless ferritic/austenitic tubes of material UNS S32760;
stock sizes (see reverse).
- ▶ SUPER DUPLEX is characterized by the two-phase structure of a ferritic, high-strength chromium steel and an austenitic CrNiMo-steel with an excellent corrosion resistance. The Cr and Ni contents are higher than in standard DUPLEX stainless steels.
- ▶ Special properties:
 - very high mechanical and physical properties
 - excellent resistance to pitting corrosion, crevice corrosion and stress corrosion cracking
 - high resistance to abrasion
 - good weldability
- ▶ A variety of critical applications in the chemical and petrochemical industry, such as on- and offshore engineering and seawater desalination plants.
